Holter 3CH Win

MODEL DL3

- State-of-the-Art Cardiac Monitoring
- Operates on 3V AAA Battery: Long-lasting and convenient power source.
- Noise-Free Data: Ensures high-quality, reliable signal with minimal interference.
- Signal Condition: Expertly designed by biopotential specialists for optimal performance.
- USB Readability: Easily accessed via USB; no need for memory card insertion or manual data retrieval. Automatically detected as a flash drive by PC.
- Top Placement Information: Features a 7-lead placement system for accurate monitoring.
- Low Power Consumption: Efficient design with a switch-off button to prevent data loss or overwriting.

ADVANCED 3-CHANNEL HOLTER MONITORING SOFTWARE

- Windows-Based Interface: Seamlessly integrates with your existing Windows system for easy data management and analysis.
- 24-Hour Comprehensive Reports: Provides detailed 24-hour reports, offering a complete view of the patient's cardiac activity.
- Page-by-Page Analysis: Breaks down data into individual pages for thorough and precise examination.
- AFib Detection: Accurately identifies atrial fibrillation, ensuring timely and accurate diagnosis.
- Consolidated Event-Wise Reporting: Organizes data by events for clear, actionable insights.
- HRV Analysis: Includes Heart Rate Variability (HRV) analysis to assess overall cardiac health and stress levels.
