HolterSync

Portable, Accurate, and AI-Driven

Medical-Grade Portable Single-Lead ECG

HolterSync is a state-of-the-art portable ECG recorder designed to measure and track your heart's rhythm with ease and clinical accuracy, anytime and anywhere.

Designed for routine heart checks, it's perfect for stroke prevention and managing conditions like atrial fibrillation, bradycardia, and tachycardia. Use it as a stand-alone device or connect seamlessly via Bluetooth® to your smartphone. Instantly view detailed reports and monitor your heart health directly on your Android device.

Accurate Heart Monitoring in One Minute

Track your heart health effortlessly with results that match clinical standards.

Designed for Comprehensive Cardiac Insights

Ideal for routine heart checks and managing conditions such as:

- Atrial fibrillation (Afib)
- Bradycardia
- Tachycardia
- Stroke prevention and management

"Discover a smarter way to monitor your heart. Contact us today and take control of your cardiac health!"
