

QUANTUM SYNCRO

The 1080 Quantum Syncro is a smart resistance system designed to build strength, power, and efficient movement. It applies computer-controlled resistance through every phase of a lift for precise concentric, eccentric, and isokinetic training. Real-time data tracks force, velocity, and power on every rep for clear performance insight. The system supports explosive training, controlled strength work, and sport-specific movements. It is also well suited for rehab and return-to-play testing with consistent, repeatable results. Compact and versatile.

- Dashboard displays each athlete with their force numbers & training sets in simple tiles & Force-position graph shows how their force changes through the full range of motion across reps
- The 1080 Quantum Syncro uses bar attachments, hand grips, ankle cuffs, pulleys, and anchor straps to support strength, power, and rehab training

Technical Specifications

Gear 1 Concentric Load

1–25 kg (2–55 lbs)

Gear 1 Eccentric Load

1–30 kg (2–66 lbs)

Gear 2 Concentric Load

1–50 kg (2–110 lbs)

Gear 2 Eccentric Load

1–60 kg (2–132 lbs)

Gear 2 Max 3s Load (Con / Ecc)

75 kg (165 lbs) / 150 kg (331 lbs)

Concentric Velocity

0.1–8 m/s (0.3–26 ft/s), max speed halved in Gear 2

Eccentric Velocity

0.1–6 m/s (0.3–20 ft/s), max speed halved in Gear 2

Sampling Frequency

333 Hz (force, speed, power)

Interface

Tablet touchscreen or laptop (Windows 10 / 11)

Column Weight

180 kg (400 lbs) each

Column Height

1.7 m (5.6 ft)

Max Cable Travel

5 m (16 ft)

We are a complete solution provider for all your Sport Science, Biomechanics, SnC, Physiology, Data Management, Data Analysis, & High Performance Management needs. We are your partners in excellence!
