ENGINEERING THE FUTURE OF HUMAN PERFORMANCE!

www.medevice.co

ABOUT US

Founded in 2019, Medevice Healthtech is a focused organization committed to strengthening healthcare and sports science infrastructure across India. The company works across Medical, Sports Science, Physiotherapy and Rehabilitation Delivering Reliable, Performance-Driven solutions to Hospitals, Sports Science Academies, Research Centers, Institutions and High-Performance Centers.

From the outset, Medevice has collaborated with established Indian and international manufacturers to make advanced, practical technologies accessible to clinicians, therapists, and sports professionals, supported by dependable execution and long-term service.

Alongside distribution and turnkey project execution, Medevice continues to build strong capabilities in product development, with a clear focus on medical, high performance, longevity, and sports science solutions. With a deep understanding of the Indian healthcare and sports ecosystem, the team works closely with customers to deliver dependable equipment, responsive technical support, and long-term value.

In a short span, Medevice Healthtech has grown into a trusted, customer focused organization serving more than 100 institutions across India. Driven by purpose and performance, we work every day to make advanced healthcare and sports science solutions accessible, reliable, and impactful nationwide.

WHO WE ARE

VISION

To lead India's evolution in healthcare, sports and longevity by bridging the gap between grassroots potential and elite performance. Empower the nation's healthcare institutions and training centers with world-class technology and specialized scientific expertise to build a healthier, high-performing India.

To empower the future of Indian sports & healthcare by providing integrated turnkey solutions that combine world-class technology with relevant subject matter expertise, ensuring peak performance & precision recovery for everyone in the nation who aims to be fit.

MISSION

Creators. Thinkers. Doers.

Our organization is guided by a dedicated core team of five senior professionals, bringing together over 50 years of collective experience in the industry. With expertise spanning Sales, Project Execution, Service & Post-Sales Support, Accounts, Administration, and Technical Operations, the leadership team ensures strong governance, seamless coordination, and a consistent focus on quality, reliability, technology-driven solutions, and excellence across all aspects of the business.

This leadership is further strengthened by a diverse and highly skilled team of 40 professionals, that includes Expert Biomechanics, Nutritionists, Psychologists, S&C Specialists, Physiologists, Physiotherapists, Service Engineers, and Sales Personnel. Technically proficient and deeply customer-focused, the team is well-equipped to manage complex technical challenges, deliver innovative and tailored solutions, and remain a dependable partner to our clients—building lasting trust through innovation and comprehensive post-sales support. Our offices and representatives are strategically located across Bangalore, Mumbai, Delhi with Pune serving as our headquarters, ensuring seamless support and accessibility for our clients nationwide.

Trusted for Performance

We are proud to showcase a selection of our professionally completed installations of specialized training equipment. Each project demonstrates our focus on precision, technical excellence, and smooth implementation to enhance operational performance. These featured installations are only a small sample of the many successful projects we've delivered. They reflect our strong commitment to quality, innovation, and ensuring our clients are fully satisfied with the results.

Where We Serve

We take pride in our growing installation footprint across India. The map below showcases major project locations, reflecting our strong presence across multiple cities nationwide.

The list Continues...

This is just a glimpse of our installations. Many more projects are underway, each one reflecting our expertise, precision, and unwavering commitment to excellence. Every detail is executed with purpose, setting a new standard for what's possible.

As we continue to push the boundaries of design and engineering, your ambition drives us forward. It challenges us to think bigger, build smarter, and deliver beyond expectations. Together, we are shaping the next great achievement.

- ESIC Hospital, Ahmedabad
- RUHS Medical College, Jaipur

Products & Services

Medevice is committed to excellence, delivering a comprehensive range of advanced medical, longevity and sports performance solutions. Serving clients from private clinics to HPCs, we provide complete end-to-end solutions including supply, installation, training, and ongoing technical support.

Our operations are structured around two major verticals — Healthcare and Sports Technology — each designed to meet specialised industry requirements. The following list highlights our core expertise and key equipment offerings; however, our capabilities are not limited to these specialties.

Health Technology

Cardiology

- Cathlab (Basic to high-end)
- AED/Defibrillator
- ECG Machine
- Cardiac Ultrasound Systems
- OCT & IVUS
- High-end Patient Monitors
- BiPaP Machine
- Intra-Aortic Balloon Pump
- Temporary Pacemakers
- Pharmacogenetics Testing

Diagnostic & Educational Aids

- Fixed DR System
- C-Arm (Basic to High-end)
- Ultrasound Systems
- Fluoroscopy Systems
- Biopsy/Probe Guides
- Retrofit FPD
- PACS & RIS Solutions
- Human Anatomy Simulators
- Procedure Simulators
- VR Based Anatomy Teaching Aid
- Medical and Nursing Training Aid
- AI X-ray Analysis and Reporting

Other Equipment

- ICU Beds/Furniture
- Syringe/Infusion Pump
- Ventilators
- Anaesthesia Workstation
- Genetic Testing Equipment

TurnKey Projects

- Cardiology Setup
- OT - Advance to Basic
- PHC Set-up
- Primary Testing
- ICU / NICU / Patient Ward Set-up

Products & Services

Physiology Equipment

- HRV sensors
- Spirometry/PFT/RMS
- VO₂/VCO₂ Max (Portable CPET)
- Upper-body Ergometer
- Lower-body Ergometer
- Sweat Monitoring
- Hydration Testing
- Hypoxia Generators
- Lactate Analyser
- Complete CPET Cart
- High Speed Treadmill with Harness
- Isokinetic Machine (Basic to Advance)
- Muscle Oximetry
- All Basic Physiology Products

Strength & Conditioning

- All Gym Equipment (Basic to High-end)
- Crossfit Equipment
- Motorised Resistance Equipment
- Free Weights
- Velocity Based Training
- Complete Modular Resistance Training Circuit
- Functional Trainers
- Magnetic Timing Gates
- Single Beam Timing Gates
- Functional Circuit
- Flywheel Training (Portable & Fixed)
- Robotic Resistance Devices
- Data Collection Device
- Portable Resistance Devices
- Self Bodyweight-Based Resistance Circuit
- Complete Reaction Agility Training Solution
- Dual Laser Timing Gates

Rapid Recovery and Injury Prevention

- Intermittent Negative Pressure Therapy
- Red Light Therapy
- Sauna/Steam Chamber
- Rapid Recovery Studios
- Electric Cryo Chamber
- Hyperbaric Oxygen Therapy (HBOT)
- Magnetic Muscle Stimulators
- Ice/Contrast Bath

Nutrition

- Body Composition Analyzer
- Skinfold Calipers
- Diet Planning Software
- Anthropometry Kit

Products & Services

Physiotherapy & Rehabilitation

- Combination Therapy (IFT, Ultrasound & Tens)
- Laser Therapy
- Tecar Therapy
- Localized Cryotherapy
- Moist Heat Therapy
- Pneumatic Compression
- Traction Unit
- Spinal Decompression Table
- Massage Gun
- Blood Flow Restriction
- Super Inductive System
- Antigravity Treadmill
- Exoskeleton
- Underwater Treadmill
- Gaiter Training System
- AI Enabled Resistance Training
- Body-Weight Based Rehab Device
- EMG Machine
- Focused Shockwave Therapy
- Mobility Aids

Biomechanics & Motion Analysis

- NextGen FMS
- 2D Posture and Gait Analysis System
- 3D Motion Capture (Marker/Markerless/Hybrid)
- Bipedal Force Plates
- 3D Force Plates
- High-Speed Cameras (Live)
- Waterproof EMG Sensors
- Digital Dynamometer Set
- Pressure Plate (S/M/L/XL)
- Inertial Measurement Units (IMUs)
- Video Analysis Software
- Smart Pressure Insoles
- Outdoor Motion Capture Lab

Sports Psychology

- NeuroTracker
- Biofeedback
- SVT (Simple Visual Test)
- VTS (Visual Training System)
- Neurobalance
- Balance Training
- Cognitive Training
- Sensory Station
- Transcranial Pulse Stimulation
- VR (Virtual Reality) Set with Software
- Neuphony
- CogniPlus
- Reaction Training and Testing Pods
- Eye Tracker

Products & Services

Expert Manpower

- Biomechanics
- Strength and Conditioning
- Sports Physiotherapist
- Sports Physiologist
- All-in-One Performance Management Agency
- Sports Psychologist
- Nutritionist
- Massage Therapist
- High Performance Manager
- Sports Scientist

AI in Sports

- Performance Intelligence Platform
- Athlete Management system
- Integrated Facility Management
- Health and Activity Tracking

Complete Integrated Solution

Our Partner Brands

We represent a curated portfolio of global brands delivering complete support across all specialized Sports Science & Healthcare departments. Our integrated technology ecosystem strengthens every stage of the athletic journey.

From grassroots talent identification using objective performance analytics, to sport-specific Centres of Excellence powered by advanced data systems, we build high-performance environments that produce results.

Our solutions are also designed for inclusivity, equipping para-athletes with adaptive, performance-focused technology to compete at the highest level. Some of our leading global partners include:

Engineered for performance!.

Get in Touch

We are more than a supplier, we are your dedicated Turnkey Partner in precision sports science and medical excellence. From elite military training nodes and defense facilities to premier medical universities and rehabilitation centers, we provide the integrated technology and specialized talent that drives measurable results.

Whether you are designing a high-end athletic facility or upgrading a clinical institution, our multidisciplinary team of engineers and specialists is ready to turn your vision into a world-class reality.

Through systematic implementation, calibration, and user competency training, we ensure each system performs at its highest technical potential.
